13-11-13-DTP/-KM-1

Con. 8055-13.

F.E. CB45 NOV. 13 sem II 845- maths. 21/11/13 GX-10120

(Revised course)

(3 Hours)

[Total Marks: 80

N.B.: (1) Question No. 1 is compulsory.

- (2) Answer any three questions from question nos. 2 to 6.
- (3) Figures to the right indicate full marks.
- (4) Programming Calculators are not allowed.

1. (a) Evaluate 
$$\int_0^8 x^2 7^{-4x^2} dx$$

(b) Solve 
$$(D^4+4)y=0$$
.

(c) Prove that 
$$E \nabla = \Delta = \nabla E$$

(d) Solve 
$$(x + 2y^3) \frac{dy}{dx} = y$$
.

(e) Evaluate 
$$\iint_{R} r^{3} dr d\theta$$
 over the region between the circles  $r = 2 \sin \theta$ ,  $r = 4 \sin \theta$ .

(f) Evaluate 
$$\int_{0}^{1} \int_{y}^{\sqrt{y}} \frac{x}{(1-y)\sqrt{y-x^2}} dydx$$

2. (a) Solve: 
$$(x^3y^4 + x^2y^3 + xy^2 + y) dx + (x^4y^3 - x^3y^2 - x^2y + x) dy = 0$$

(b) Change the order of integral and hence evaluate 
$$\int_0^5 \int_{2-x}^{2+x} dxdy$$

(c) Prove that 
$$\int_0^1 \frac{x^2}{\sqrt{1-x^4}} dx \int_0^1 \frac{dx}{\sqrt{1+x^4}} = \frac{\pi}{4\sqrt{2}}$$

3. (a) Evaluate 
$$\int_0^1 \int_{y^2}^1 \int_0^{1-x} x \, dx \, dy \, dz$$
.

(b) Find the area of one loop of the lemniscate 
$$r^2=a^2 \cdot \cos 2\theta$$

(c) Solve 
$$(D^3+2D^2+D)y = x^2e^{3x}+\sin^2x+2^x$$
.

4. (a) Show that the length of arc of the parabola 
$$y^2 = 4ax$$
 cut off by the line  $3y = 8x$  is  $a(\log 2 + \frac{15}{16})$ 

(b) Using the method of variation of parameters solve 
$$\frac{d^2y}{dx^2} + 4y = \tan 2x$$
.

(c) Compute y(0.2) given 
$$\frac{dy}{dx} + y + xy^2 = 0$$
, y(0)=1 by taking h = 0.1 using Runge-Kutta method of fourth order correct to 4 decimals.

- 5. (a) Solve  $\frac{dy}{dx} + x(x+y) = x^3(x+y)^3 1$ .
  - (b) Solve  $\frac{dy}{dx} 2y = 3e^{x}$ , y(0) = 0 using Taylor series method. Find approximate value of y for x = 1 and 1.1.
  - (c) Evaluate  $\int_0^6 \frac{dx}{1+x}$  using
    - (i) Trapezoidal rule
    - (ii) Simpson's  $\left(\frac{1}{3}\right)^{rd}$  rule and
    - (iii) Simpson's  $\left(\frac{3}{8}\right)^{th}$  rule.

Compare result with exact values.

6. (a) The current in a circuit containing an inductance L, registance R and voltage E sin wt is given by

$$L \frac{di}{dt} + Ri = E sinwt$$

If i = 0 at t = 0, find i.

- (b) Evaluate  $\iint_{R} e^{2x-3y} dxdy$  over the triangle bounded by x + y = 1, x = 1, y = 1.
- (c) Find the volume of solid bounded by the surfaces  $y^2 = 4ax$ ,  $x^2 = 4ay$  and the planes Z = 0, Z = 3.
  - (ii) Change to polar co-ordinates and evaluate

 $\int_{0}^{a} \int_{\sqrt{ax-x^{2}}}^{\sqrt{a^{2}}-x^{2}} \frac{dxdy}{\sqrt{a^{2}-x^{2}-y^{2}}}$

## (REVISED)

(2 Hours)

[Total Marks: 60

N		<ol> <li>Question No. 1 is compulsory.</li> <li>Attempt any three questions from Q.no. 2 to Q.no. 6.</li> <li>Assume suitable data and symbol if required.</li> <li>Figures to the right indicate full marks.</li> </ol>					
1.	Atte	mpt any <b>five</b> : -  (a) Explain why an extensive thin film appears black in reflected light?  (b) How will you increase the resolving power of a diffraction grating?  (c) Calculate the numerical aparture of a fiber with core index $n_1 = 1.01$ and cladding index $x_2 = 1.55$ $n_2 = 1.55$	3 3				
~		<ul> <li>(d) What is the difference between spontaneous and stimulated emissions.</li> <li>(e) An electron is bound by a potential which closely approaches an infinite square well of width 2.5 x 10<sup>-10</sup>m. Calculate first lowest permissible energy</li> </ul>	3				
		for electron.  (f) Write any two applications of CRO.  (g) What is MAGLEV?	3				
2.	(a)	What do you understand by anti reflection coating? Derive the conditions with proper diagram.	8				
nbd		What is N.A.? Consider a multimode step under fibre with $n_1 = 1.53$ and $n_2 = 1.50$ and $x_2 = 1.50$ . If the core radius = $50$ pm than calculate the realised frequency of the fibre (V) and the number of guided mode.					
3.	(a) (b)	What is the difference between holography and photography? Discuss the construction and reconstruction of image in holography with neat diagram. Derive the conditions for maxima and minima due to interference of light reflected from thin film of uniform thickness.	8				
4.	(a) (b) (c)	What is the highest order spectrum which can be seen with monochromatic light of wavelength 6000 A <sup>0</sup> by means of a diffraction grating with 5000 lines / cm. Explain the Hesenberg's uncertainity principle. What are Type I and Type II superreconductors?					
5.	(a) (b) (c)	A plane grating just resolve two lines in the second order. Calculate the grating element if d $\lambda = 6$ A <sup>0</sup> , $\lambda = 6 \times 10^{-5}$ cm and the width of the ruled surface is 2cm. Derive shrodingers time dependent wave equation. Explain the working of SEM with a neat diagram.					
5.	(a)	Find the energy of the neutron in units of electron volts where De-broglie wavelength is $\overset{0}{A}$ mass of neutron = 1.674 x $10^{-27}$ kg planck's constant = 6.620 x $10^{-34}$ J.sees	5				
	(b) (c)	Write a short note on electrostatic forcussing.  What are carbon tubes and what are their properties.	<b>5</b>

Con. 5731-13.

## (REVISED COURSE)

GX-10141

(2 Hours)

[Total Marks: 60

- N.B.: (1) Question No. 1 is compulsory.
  - (2) Attempt any three questions from remaining five questions.
  - (3) All questions carry equal marks.
  - (4) Atomic Weights: H = 1, C = 12, N = 14, O = 16, S = 32, CI = 35.5,  $Ba = 137.\overline{3}$ .
- 1. Answer any five of the following:-

15

- (a) Define Octane number of gasoline, Name any two anti-knock agents.
- (b) Why is galvanization of iron articles preferred to tinning?
- (c) Give composition, properties and uses of Wood's metal.
- (d) Explain 'prevention of waste' principle in Green Chemistry.
- (e) Define 'matrix phase' of composite material. State functions of matrix phase.
- (f) State characteristics of a good paint.
- (g) A coal sample was subjected to ultimate analysis. 1.5g of coal on combustion in a Bomb calorimeter gave 0.42g of BaSO<sub>4</sub>. Calculate percentage sulphur in the coal sample.
- 2. (a) How do the following factors affect the rate of corrosion?

6

- (i) Retative areas of anodic and cathodic parts.
- (ii) Passive character of metal.
- (iii) pH of medium.
- (b) What is Biodiesel? Give 'Trans-estinfication reaction in preparation of Biodiesel 5 from vegetable oils. What are the advantages of Biodiesel?
- (c) Calculate percentage atom economy for the following reaction with respect to 4 acetophenone:—

$$C_6H_6 + CH_3COCI \xrightarrow{AICI_3} C_6H_5COCH_3 + HCI$$
  
benzene acetophenone

3. (a) A gaseous fuel has the following composition by volume :-  $H_2 = 50\%$ , CO = 10%,  $CH_4 = 30\%$ ,  $C_2H_4 = 5\%$ ,  $N_2 = 1\%$ ,  $O_2 = 2\%$  and  $CO_2 = 2\%$ .

Calculate volume and weight of air required for complete combustion of 1  $m^3$  of fuel. (Mol. wt. of air = 28.949).

- (b) Explain conventional and green chemistry route of production of adipic acid. 5 Highlight the green chemistry principle involved.
- (c) Discuss differential aeration corrosion with the help of a suitable example.

[TURN OVER

examples.

2

What are alloy steels? Explain special effects of the following metals on properties 6 of alloy steels:-Chromium (i) Nickel (ii) Cobalt (III) Tungsten. (iv) What is the principle of cathodic protection method of corrosion control? Discuss 5 (b) any one method of corresion control by cathodic protection. Write a note on 'sandwich panel' type layered composites. What is cracking? With a schematic diagram, explain any one method of catalytic 6 cracking. What is powder metallurgy? How are metal powders prepared? Discuss the influence of any two physical factors on adhesive action. What is 'oxidation corrosion'? Discuss the role of nature of oxide formed in oxidation corrosion. A sample of coal has the following composition by weight:-(b) C = 82%, H = 6%, O = 8%, S = 0.5%, N = 3% and Ash = 0.5%. Calculate the Gross and Net Calorific value using Dulong's formula.

\*\*\*\*\*

(c) What is an alloy? Explain any four purposes of alloying with suitable 5

Structured Programming Approach. FE (Sem-II) 07 Dec 2013.

Con. 5529-13.

(REVISED COURSE)

GX-10151

(3 Hours)

[Total Marks: 80

N.	В.	: (	1)	Ouestion	No.	1	is	compulsory.
----	----	-----	----	----------	-----	---	----	-------------

- (2) Attempt any three questions from remaining five questions.
- (3) Figures to right indicate full marks.
- (4) Assume suitable data if necessary, but justify the same.
- 1. (a) What do you mean by algorithm? which points you should consider while developing 4 the algorithm.
  - (b) Find the roots of quadratic equation. Is the above problem definition is 4 complete? if not, make this problem definition complete.
  - (c) State any 2 library functions in math.h along with its uses.
  - (d) What do you mean by static and auto storage class. explain.
  - (e) Difference between while and do.. while loop.
- 2. (a) Write a program in C to cyclically rotate the elements in array. Program should 10 accept a choice in which direction to rotate i.e. left or right. Depending on choice it should perform cyclic rotation.
  Suppose array A contains elements {1, 2, 3, 4, 5} then if choice is rotate right o/p should be {5, 1, 2, 3, 4} and if choice is rotate left then o/p should be {2, 3, 4, 5, 1}
  - (b) Write a program to generate prime nos between 1 to 100.

10

- 3. (a) What do you mean by recursion? Write a program, which will accept 2 nos from 10 user say x and y. and calculate x<sup>y</sup>. Program should make use of recursion.

  If x is 3 and y is 4 then output should by 3<sup>4</sup> i.e. 81.
  - (b) Write a program to sort given nos in descending order.

10

- 4. (a) What do you mean by struct? What do you mean by nested structure? A sport club of cricket needs to maintain data about players. Description of it is given below. Club want to maintain players name, age, no of matches played, no of runs, and average. For above description declare a structure and comment about size of structure of your declaration.
  - (b) Write a program which will accept 2 dimensional square matrix and find out 10 transpose of it. Program should not make use of another matrix.

[ TURN OVER

## Con. 5529-GX-10151-13.

2

5. (a) Write a program to generate followig patterns.

(1) 5
4 4
3 3 3
2 2 2 2
1 1 1 1 1

(2) 1
2 2
3 3 3
4 4 4 4
5 5 5 5 5

- (b) Write a program to check whether given string is palindrome or not.
- 6. (a) What are the different ways for parameter passing to a function. Explain along with 10 example.
  - (b) What do you mean by FILE? What are the different functions available to read 10 data from the file? Specify the different modes in which files can be opened along with syntax.

2-11-13-DTP28-NK-5

Con. 6498-13.

F.E Semit GBG 12/12/13 Communication skill

## (REVISED COURSE)

GX-10165

(2 Hours)

[Total Marks: 40

N.B.: (1) Question no. 1 is compulsory. (2) Attempt any three questions out of the remaining five questions. (3) All questions carry equal marks. Answer the following:-Write short notes on any two of the following:-(a) Principles of business letter writing (any two) Objectives of communication. (11)Role of silence in communication. (iii)Discuss some of the barriers to effective reading. Answer the following questions:-Discuss the importance of feedback in the process of communication with the help of a labelled diagram. Give a diagrammatic representation of the semi-block form of letter. Define the following:-(i) Computer, (ii) Electric Iron, (iii) Calculator Answer the following questions:-What are the various channels of communication in a business organisation? Differentiate between upward and downward channels of communication. Assuming yourself to be the General Manager of a newly established company providing hardware and networking services, write an enquiry letter inviting quotations from reported companies to supply parts/peripherals in bulk for your routine requirement. Invent the necessary details. Use complete block form. Discuss any two main barriers to communication. Why are they considered unhealthy in an organisation? You have purchased an expensive gadget of a reputed company from a retail store in Mumbai. After four months, the gadget stops working suddenly and shows an error message whenever you try to use it. Write a complaint lettter to the store

owner complaining about the same and ask for compensation.

5.	Do as directed:-									
	(a)	Use an	y two sets of words to form a single sentence:-							
		(i)	dessert - desert							
		(ii)	stationary - stationery							
		(iii)	principal - principle							
	(b)	What is	s jargon? How does it affect the understanding of the receiver? Explain with	4						
		an exar	nple.							
	(c) Give synonyms for any two:-									
			(i) cherish, (ii) ideal, (iii) labyrinth							
	(d)	Give antonyms for any two:-								
			(i) hero, (ii) frail, (iii) disappear							
	(e)	Correct the error in the following sentences:-								
		(i)	Teacher called Harry and I to the staffroom.							
		(ii)	It's 2 O'clock in my watch.							
•	(a)	Disting	uish between caution and warning with an example of each.	2						
	(b)	b) What is grapevine type of communication? Explain with a relevant example.								
	(c)	(c) Read the following passage and answer questions given below it:								
		Communication is part of our everyday life. We greet one another, smile								
		depend	ing on our moods. Animals, too, communicate in the same way, much to							
		our surprise. Just like us, interaction among animals can be both verba								
		verbal.								
		Singing	g is one way in which animals can interact with one another. Male black-							
		birds of	ften use their melodious songs to catch the attention of the females. These							
			re usually rich in notes variation, encoding various kinds of messages. Songs							
		are also	used to warn and keep off other blackbirds from their territory, usually a							
		place w	here they dwell and reproduce.							
		Large mammals in oceans sing, too, according to adventurous sailors. Enormous								
		whales groan and grunt while smaller dolphins and porpoises produce pings, whistles								
		and clicks. These sounds are surprisingly received by other mates as far as several								
		hundred kilometers away.								
		Besides singing, body language also forms a large part of animals' communication								
		tactics. Dominant hyenas exhibit their power by raising the fur hackles on their								
		necks and shoulders, while the submissive ones normally surrender to the powerful								
		_	by crouching their heads low and curling their lips a little, revealing their							
		teeth in	friendly smiles.							

Colours, which are most conspicuously found on animals, are also important means of interaction among animals. Male birds of paradise, which have the most gaudy coloured feathers often hang themselves upside down from branches, among fluffing plumes displaying proudly their feathers, attracting the opposite sex.

The alternating black and white striped coats of zebras have their roles to play too. Each zebra is born with a unique set of stripes which enables its mates to recognise them. When grazing safely, their stripes are all lined up neatly, so that none of them loses track of their friends. However, when danger such as a hungry lion approaches, the zebras would dart out in various directions, making it difficult for the lion to choose his target.

Insects, such as the wasps, armed with poisonous bites or stings, normally have brightly painted bodies to remind other predators of their power. Hoverflies and harmless insects also make use of this fact and colour their bodies brightly in an attempt to fool their predators into thinking that they are as dangerous and harmful as the wasps.

- (i) How is singing used by animals?
- (ii) How long can a whale's grunt be heard in the ocean?
- (iii) How do zebras react to the danger of an attacking lion?
- (iv) How do dominant hyenas exhibit their power?
- (v) Which animals / birds have been mentioned in the above passage having gaudy colours?

2nd Half-2013-mina-(c)-69

Con. 5737-13.

(REVISED COURSE)

GX - 10171

9

(3 Hours)

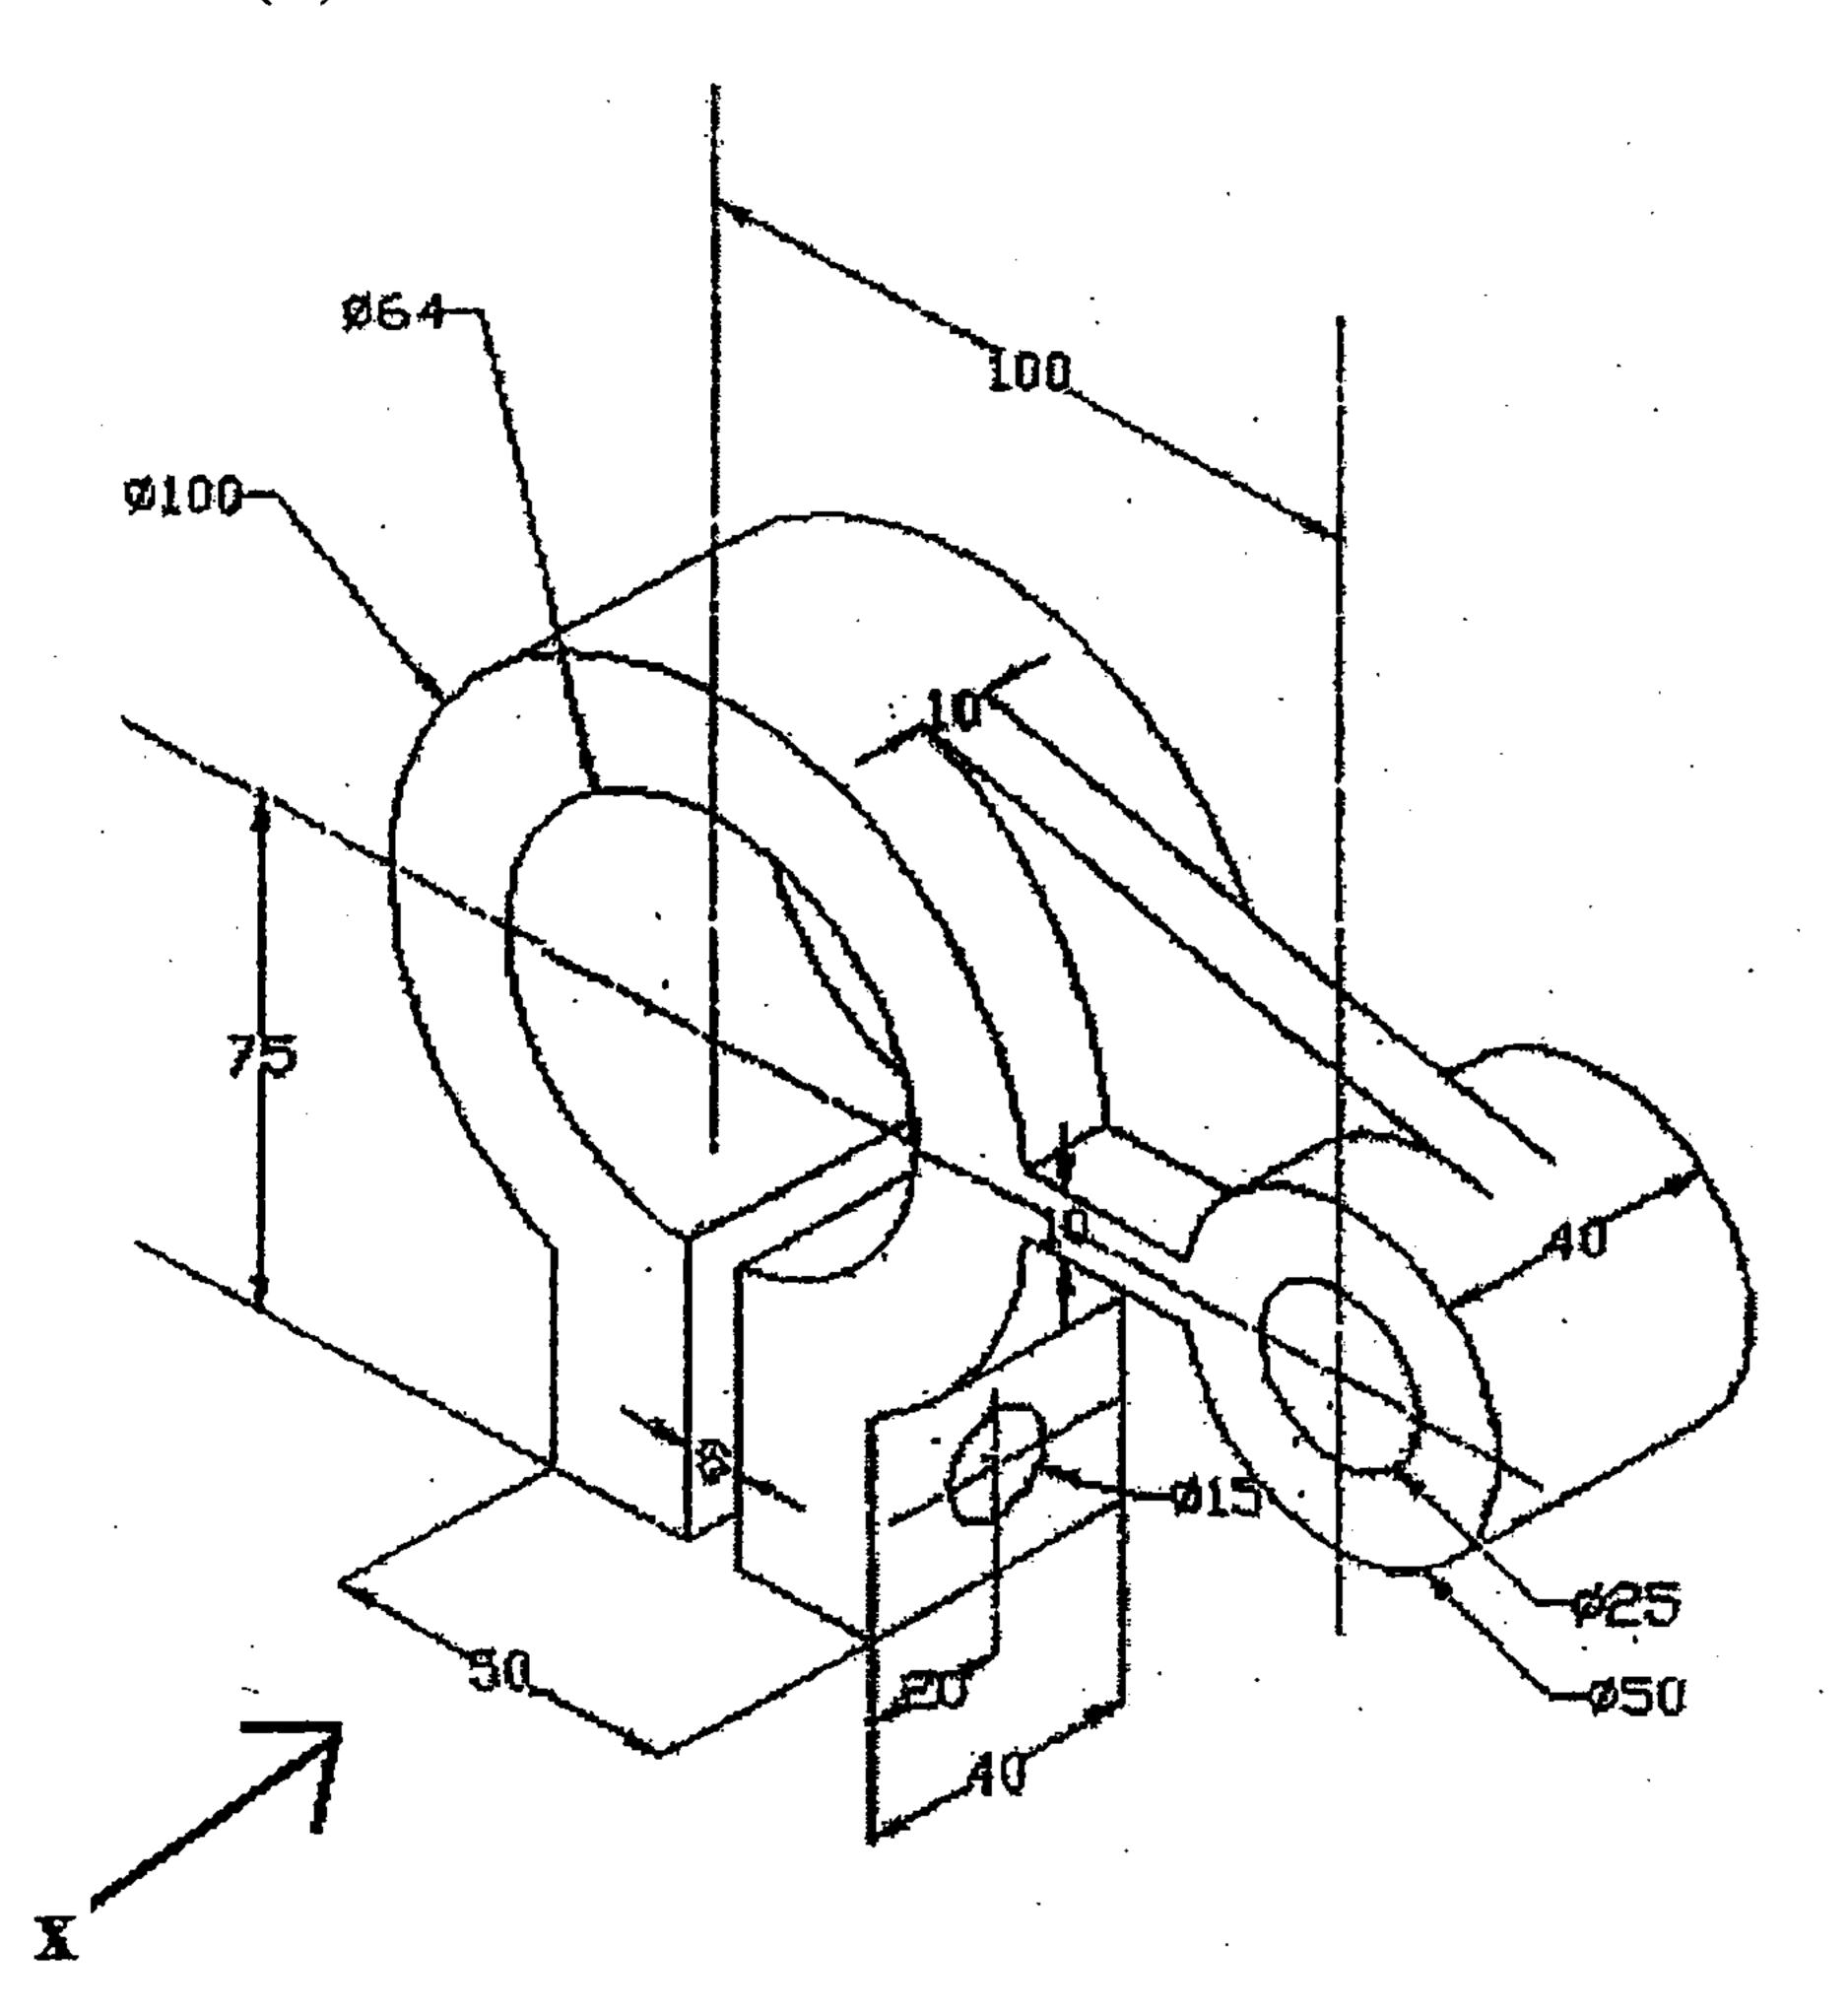

[Total Marks: 60

- N.B.: (1) Question No. 1 is compulsory. Answer any three from the remaining five questions.
  - (2) All dimensions are in mm.
  - (3) Assume suitable data, wherever required.
  - (4) Use pencil only to draw diagrams.
  - (5) Use only first angle of projection.
  - (6) Retain all construction lines.
- 1. (a) A line AB 100 mm long is tangent at the top of a circular disc of 70 mm. diameter.

  The point A is at the top of the circumference. The line AB rolls around the circumference of the circular disc in a clockwise direction. Draw the locus of the end 'A', till the end B touches the circle. Name the curve.
  - (b) Pictorial view of a block is shown in figure.

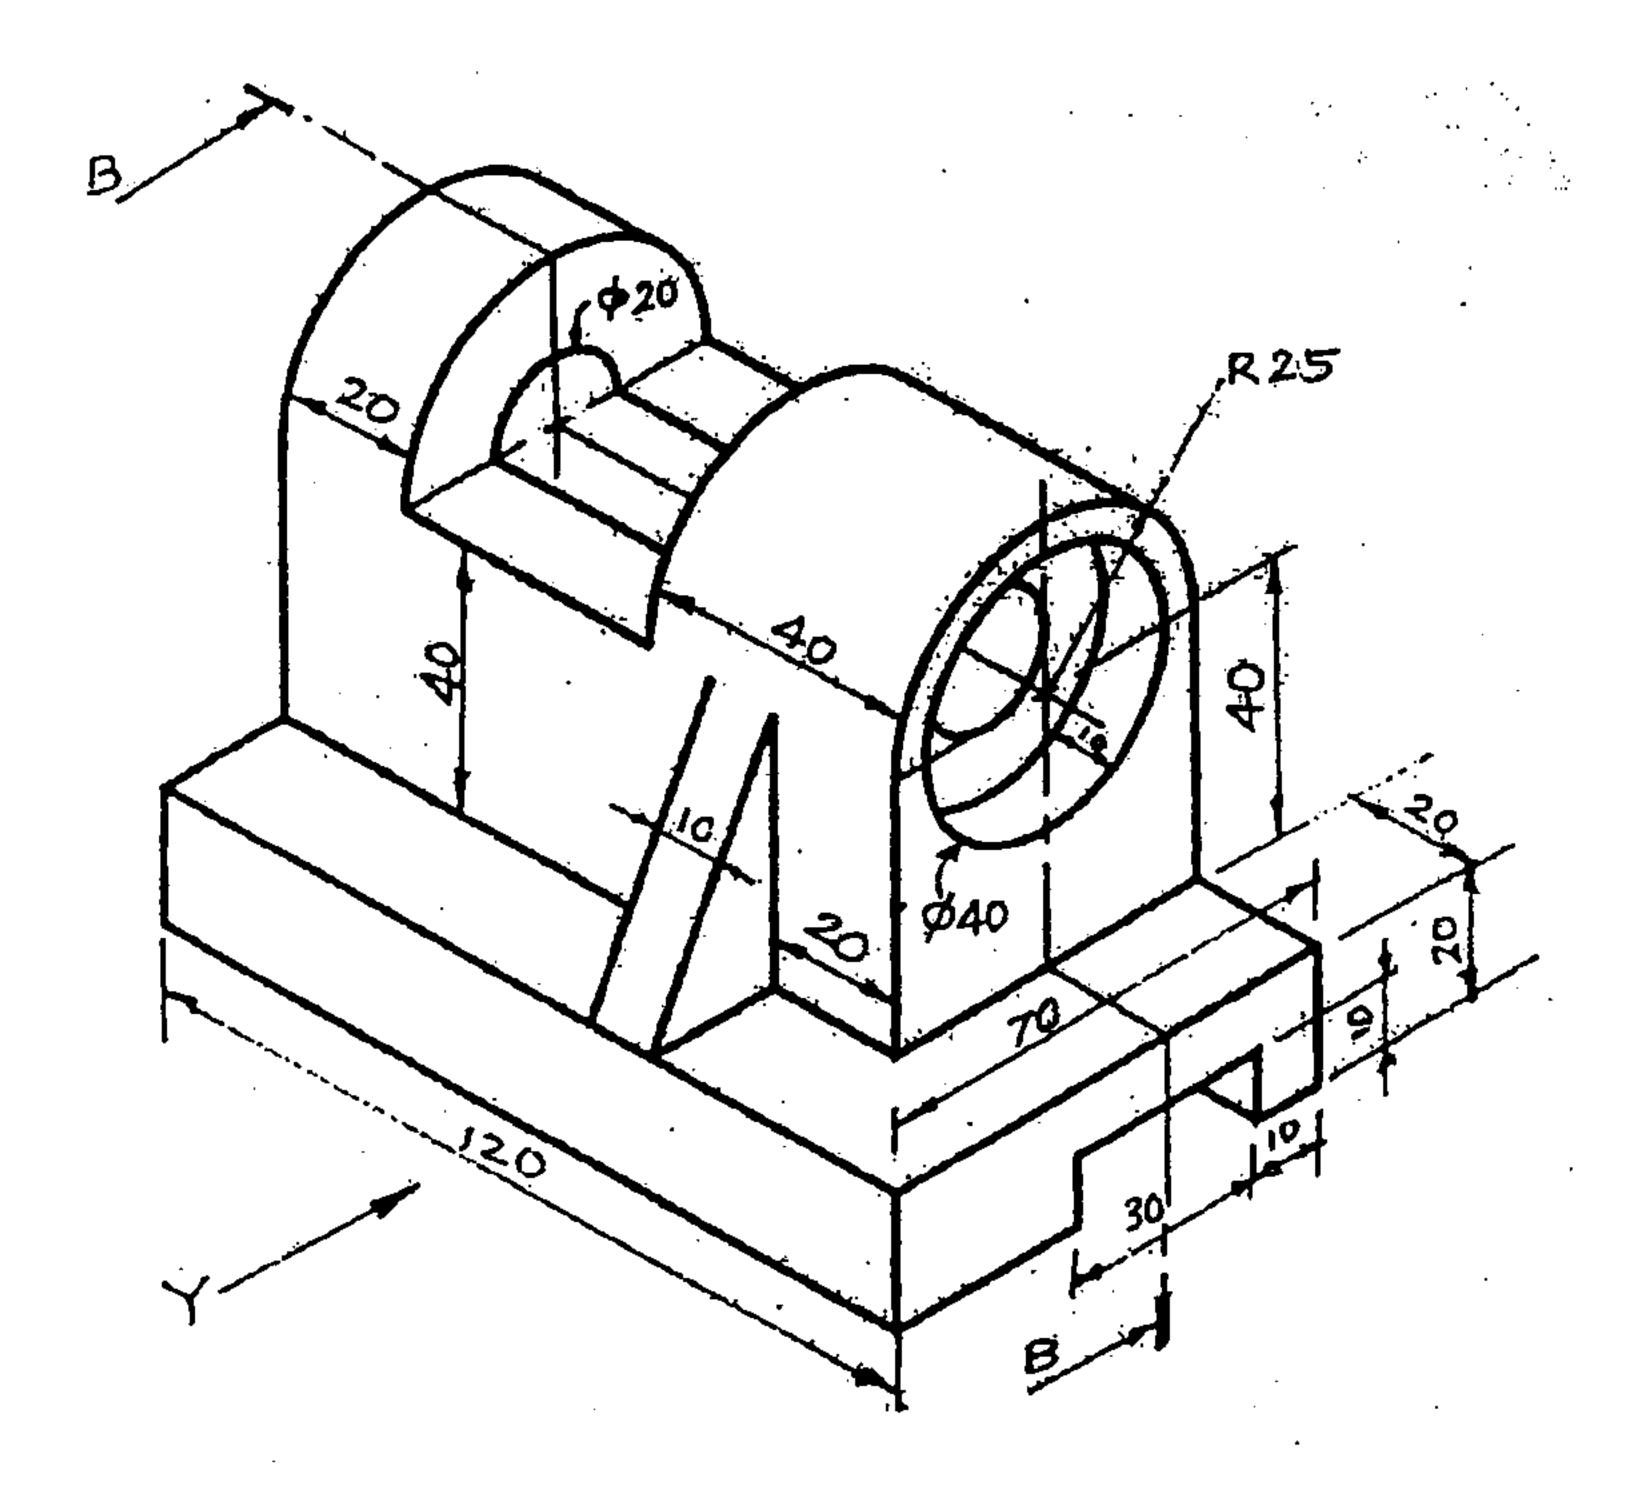

Draw its: (i) F. V. along 'X' and

(ii) RHSV

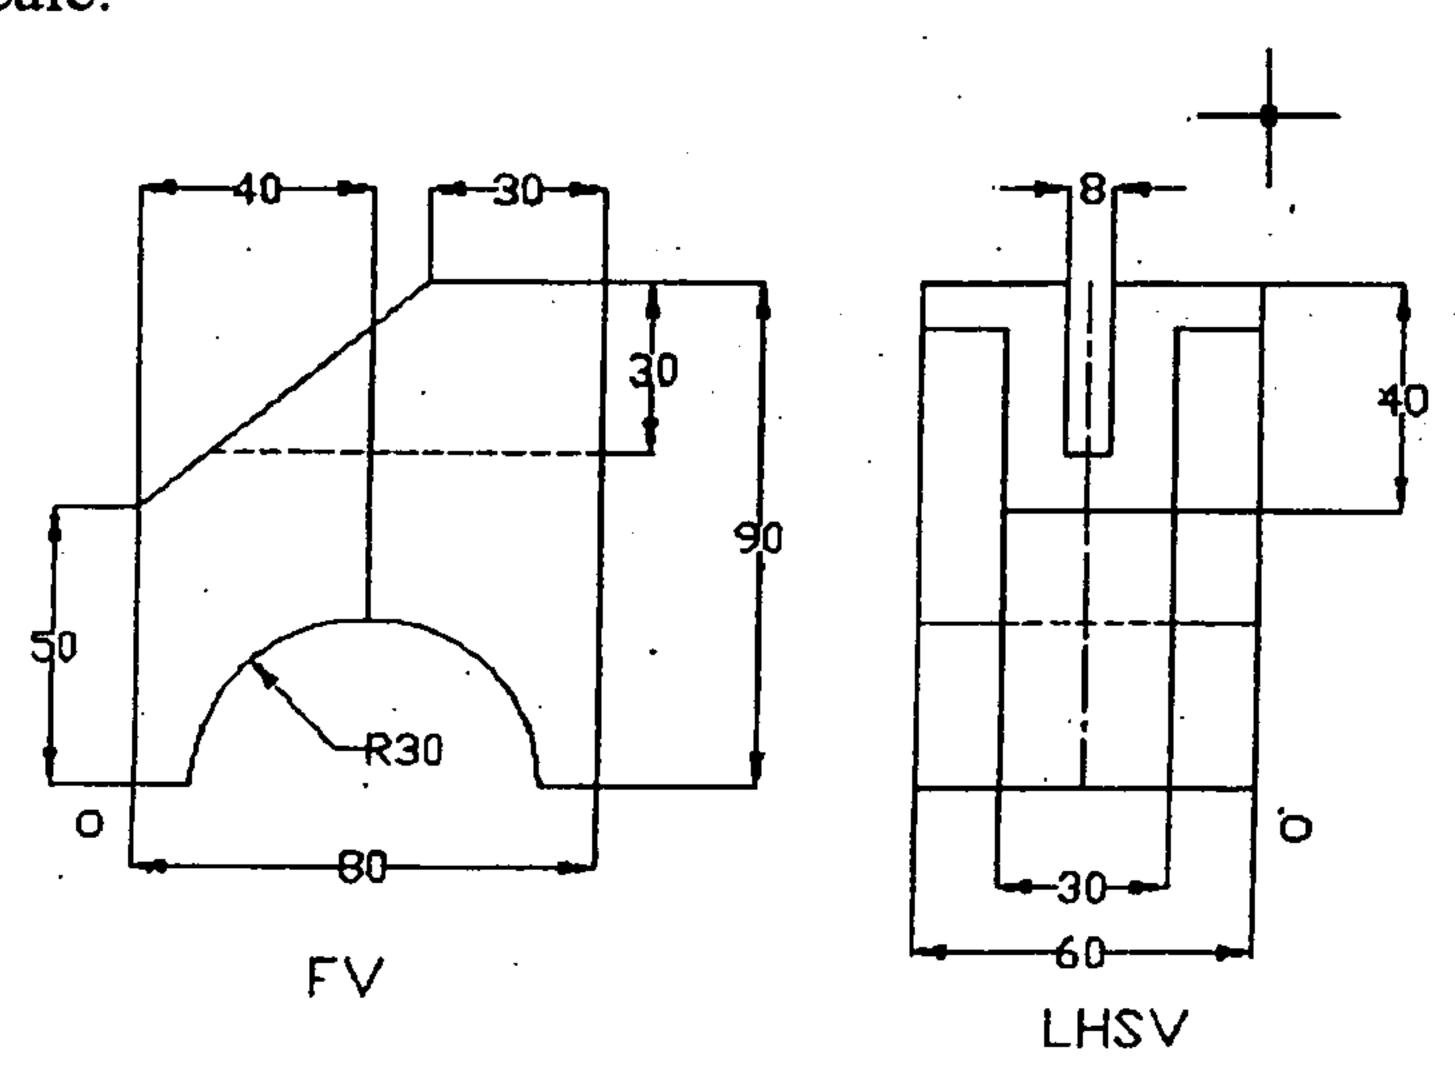

- 2. For the given pictorial view, draw:—
  - (a) Sectional F. V. (Section B-B)
  - (b) T. V.
  - (c) RHSV.

Insert at least 10 major dimensions.

- 3. A pentagonal pyramid, 40 mm edge of the base and axis height 70 mm is resting on one of its corner of base in VP. The edge opposite to the corner is parallel to and 45 mm in front of VP and parallel to HP. Draw the projections when apex is nearer to observer.
- 4. (a) A hexagonal prism with edge of bars 30 mm and height 70 mm has its edge of base in the VP and the base surface is inclined at 30° to VP and ⊥r to HP. Draw its projections.
  - (b) Figure shows F. V. and T. V. of an object. Draw isometric view of the object, using natural scale.

- 5. A hexagonal pyramid base 25 mm side, axis 55 mm long has its base on HP, with an edge of base parallel to VP. A section plane perpendicular to VP and inclined at 60 degrees to HP bisects the axis of the pyramid. Draw FV, sectional TV, true shape of the section and Development of Lateral Surface of pyramid removing apex.
- 6. (a) Line AB 70 mm long is inclined 30° to HP and 60° to VP. Its end A is 10 mm above HP and 20 mm infront of VP, while its end B is in 3<sup>rd</sup> Quadrant. Draw projections of line AB.

(b) Draw the isometric view using given F. V. and LHSV.
